

Off-Campus Education Programs for High School Students

Are you interested in gaining hands-on work experience while still in high school? We have some fantastic opportunities for students to explore through the Registered Apprenticeship Program (RAP), Work Experience Program, Dual Credit and Green Certificate Programs!

RAP (Registered Apprenticeship Program): RAP allows you to start your apprenticeship training in one of Alberta's 50+ Trades while you are still in high school. You will work alongside experienced tradespeople, earn a wage, and gain valuable skills in your chosen trade. Plus, you will simultaneously earn credits towards your high school diploma and towards your Alberta Journeyman Certification.

Dual Credit Program: Through the Dual Credit Program, high school students are able to take college level courses from a partner Post-Secondary Institution and receive both high school AND post-secondary credits. Tuition is free for students (textbooks are extra) and most of the courses offered are transferable to multiple post-secondary institutions. Students gain confidence to succeed academically in a post-secondary environment, easing the transition after high school. Contact your Principal for more information!

Green Certificate Program: The Green Certificate Program provides students with opportunities to enter a variety of agriculture-related pathways as a part of their high school programming. Students learn on the worksite, under the direction of experienced farm personnel. Options include Equine, Beekeeping, Poultry, Cow-Calf, Feedlot, Sheep, Swine, Dairy and more!

These Off-Campus Education programs offer a unique and exciting opportunity to learn outside of the classroom, build your resume, gain valuable experience and jumpstart your career while still in high school.

If you are interested in any of the programs listed above, please contact the Off-Campus Coordinator and/or Principal at your school.
